1. FOREWORD BY HIS WORSHIP THE MAYOR

The purpose of this document is to present UThukela District Municipality Service Delivery and Budget Implementation Plan (SDBIP) for 2019/2020 financial year. The Municipal Finance Management Act (Act 56 of 2003) requires a municipality to develop, implement and monitor the SDBIP.

The SDBIP is a management plan for implanting the IDP through the approved budget, it's a detailed one year plan of a municipality that gives effect to the IDP and the budget of the municipality. It is a commitment document for UThukela District Municipality to meet specific service delivery and budget spending targets.

The targets contained in this document will specify how UThukela District Municipality will implement the objectives set out in the IDP.

In a nutshell the SDBIP will assist the executive, council and the community in their respective oversight responsibility since it serves as an implementation and monitoring tool.

Cllr AS Mazibuko

2. INTRODUCTION BY THE MUNICIPAL MANAGER

The SDBIP is a contract between the Administration, Council and Community where the goals and objectives as set out by the council are quantified and can be implemented by the administration of the municipality. Municipal Managers are encouraged to develop the SDBIP concept further so that it is meaningful and useful to managers.

Whilst the budget sets yearly service delivery and budget targets (revenue and expenditure per vote), it is imperative that in-year mechanisms are able to measure performance and progress on a continuous basis. Hence, the end-of-year targets must be based on quarterly and monthly targets, and the

Municipal manager must ensure that the budget is built around quarterly and monthly information. Being a start-of-year planning and target tool, the

SDBIP gives meaning to both in-year reporting in terms of section 71 (monthly reporting), section 72 (mid-year report) and end-of-year annual reports.

The SDBIP is essentially the management and implementation tool which sets in-year information, such as quarterly service delivery and monthly budget targets, and links each service delivery output to the budget of the municipality, thus providing credible management information and a detailed plan for how the municipality will provide such services and the inputs and financial resources to be used. The SDBIP indicates the responsibilities and outputs for each of the senior managers in the top management team, the inputs to be used, and the time deadlines for each output. The SDBIP will therefore determine the performance agreements of the municipal manager and senior managers, including the outputs and deadlines for which they will be held responsible. The SDBIP should also provide all expenditure information (for capital projects and services) per municipal ward, so that each output can be broken down per ward, where this is possible, to support ward Councilors in service delivery information.

The SDBIP aims to ensure that managers are problem-solvers, who routinely look out for unanticipated problems and resolve them as soon as possible and enables the Council to monitor the performance of the municipality against quarterly targets on service delivery.

Being a management and implementation plan (and not a policy proposal), the SDBIP is not required to be approved by the council. It is however tabled before council and made public for information and for the purpose of monitoring. The SDBIP should be seen as a dynamic document that may (at lower layers of the plan) be continually revised by the municipal manager and other top managers, as actual performance after each month or quarter is taken into account. However, the top-layer of the SDBIP and its targets cannot be revised without notifying the council, and if there is to be changes in service delivery targets

and performance indicators, this must be with the approval of the council, following approval of an adjustments budget (section 54(1) (c) of MFMA). This Council approval is necessary to ensure that the Executive Mayor or Municipal Manager do not revise service delivery targets downwards in the event where there is poor performance.

6. COMPONENTS OF THE SDBIP

- ✚ Monthly Projections of Revenue to be collected for each Source
- ✚ Monthly Projections of Expenditure and Revenue for each Vote
- ✚ Quarterly projections of Service Delivery Targets and Performance Indicators for each Vote
- ✚ Detailed Capital Budget Broken Down by Ward over 3 Years

Monthly Projections of Revenue to be collected for each Source

The failure to collect revenue as budgeted will severely impact on UThukela District Municipality's ability to provide services to the community. The Municipality therefore has to institute measures to achieve its monthly revenue targets for each source. These measures will enable the Municipality to assess its cash flow on a monthly basis with a view to undertaking contingency plans should there be a cash flow shortage or alternatively invest surplus cash. Furthermore, the effectiveness of credit control policies and procedures can be monitored with appropriate action taken if considered necessary.

Monthly Projections of Expenditure and Revenue for each Vote

The monthly projection of revenue and expenditure per vote relate to the cash paid and reconciles with the cash flow statement adopted with the budget. The focus under this component is a monthly projection per vote in addition to projections by source. When reviewing budget projections against actual, it is useful to consider revenue and expenditure per vote in order to gain a more complete picture of budget projections against actuals.

Quarterly Projections of Service Delivery Targets and Performance Indicators for each Vote

This component of the SDBIP requires non-financial measurable performance objectives in the form of service delivery targets and other indicators of performance. The focus is on outputs rather than inputs. Service delivery targets relate to the level and standard of service being provided to the community and include the addressing of backlogs in basic services. The

approach encouraged by National Treasury's MFMA Circular No. 13 is the utilization of scorecards to monitor service delivery.

Detailed Capital Budget over Three Years

Information detailing infrastructural projects containing project description and anticipated capital costs over the three year period. The procurement process is an important component to ensure effective and timely infrastructure / capital service delivery
